DETAILED ACTION

1. This action is in response to applicant's amendment received on 07/19/06.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over House, II et al. (4,677,362) in view of Mineck (4,533,306).

House, II et al. discloses (Fig. 10) the invention substantially as claimed including:

- Claims 1 and 10; a clip 20 (it is integral with the holster 12, which allows the clip to be directly and only attached to the housing, see Fig. 7).
- Claims 2-3; a clip can be mounted in two distinct positions (Fig. 1-4).
- Claims 4-5, 9 and 11; the mounting positions are on a motor portions (Fig. 1 and 4).
- Claim 6; clip is adapted to suspend the device from a user's belt (see col. 3, lines 32-33).
- Claims 7 and 12-14; a first projection and a second projection (Fig. 2).
- Claim 8; clip is injection molded from plastic and unitary in construction (Fig. 2).

House, II et al. does not show a reciprocating saw. However, Mineck teaches a reciprocating saw 11 for the purpose of cutting studs. It would have been obvious to one having ordinary skill

in the art at the time the invention was made to have modified the device of House, II et al. by providing the reciprocating saw as taught by Mineck in order to obtain device that cuts studs.

Response to Arguments

4. Applicant's arguments have been fully considered but they are not persuasive. Applicant argues that House's clip is not directly and only attached to the housing. However, House's clip is integral with the holster 12, which allows the clip to be directly and only attached to the housing. Regarding a rotary motor, it would have been obvious to one having ordinary skill in the art to recognize that House and Mineck operate with a rotary motor inherently disclosed. Applicant argues that the clip of House is not mounted in two distinct positions. However, House's clip is capable of being mounted in two distinct positions (left or right positions).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
